# Glass break simulator

Kode: GBT-212

The GBT-212 is for testing acoustic glass-break detectors. It detects the air pressure changes caused by the flexing or bending of glass and then automatically generates sound imitating the breaking of the glass.

## Produktbeskrivelse:

It is also possible to trigger the sound manually using the test button.

## Teknisk information:

| | |
|---|---|
| **Power supply** | 9 V battery (type 1604) |
| **Power consumption** | 6 mA in stand by<br>Max. 200 mA<br>30 uA after automatic turn off<br>(the switch remains in the ON position) |
| **Operating range** | 9 m |
| **Low battery warning** | from 8 V |
| **Environmental class II.** | General interior (-10 to +40 °C) |
| **Complies with** | ETSI EN 300 220 |
| **Dimensions** | 70 x 135 x 29 mm |
