Bus emergency/control wall-mounted button

Code: JA-112J

The JA-112J bus wall-mounted button is designed to release an emergency alarm or to control PG outputs.

Product description:

It is equipped with two buttons and a signal LED that can indicate pressing of a button on activation or switching a PG output on or off (with red/green light). It also has the function of the delayed activation of an emergency alarm (when the activation can be cancelled with repeated pressing). A delayed alarm is indicated by flashing of the red LED. The button is addressable and it occupies one position in the system

Technical information:

Power	from the control panel digital BUS 12 V (9 - 15V)
Current consumption in standby mode	5 mA
Current consumption for cable choice	5 mA
Dimensions, weight	80 x 80 x 29 mm, 60g
Operational environment according to EN 50131-1	II. Indoor general
Operation temperature range	-10 °C to + 40 °C
Complies with	EN 50130-4, EN 55022, EN 50581
