Stand-alone carbon monoxide detector with display

Code: EI208DW

The product serves for the detection of CO (carbon monoxide) gas and early warning to avoid the harmful effects of this gas on human health.
Expiration: 02/2033

Product description:

The detector is certificated for use in building interiors, caravans and boats.

The detector indicates excessive carbon monoxide concentration both optically with a LED (Ei208DW also shows the concentration data on the display) and acoustically using a built-in siren.

The detector is powered with an integrated lithium battery which supplies the detector for its whole service life.

Technical information:

Usable life	the end of life date is stated on the label
Power	Integrated non-replaceable lithium battery
Typical battery lifetime	for the whole usable life of the detector
Operating temperature range	0 °C to +40 oC
Humidity range	15% to 95% (non-condensing)
Dimensions, weight	120 x 105 x 40 mm, 170 g
Conformity	EN 50291-1; EN 50291-2, EN 50270
