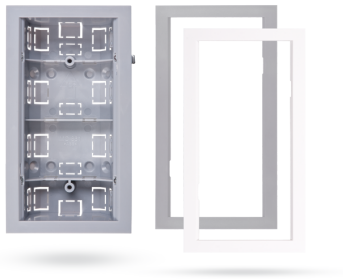
The dual PIR and MW wall holder

Code: JA-196PL-L



The bracket has been designed for the installation of a dual PIR and MW detector, the JA-122PW or the JA-162PW onto a plasterboard or brick wall. Thanks to this way of installation the detector is partly flush-mounted and fits the wall in a very elegant way.

Product description:

The wall bracket is available in two colour versions - white and grey.

Technical information:

Frame mounting holes	65 x 157 mm
