

Glass break simulator

Kode: GBT-212

The GBT-212 is for testing acoustic glass-break detectors. It detects the air pressure changes caused by the flexing or bending of glass and then automatically generates sound imitating the breaking of the glass.

Produktbeskrivelse:

It is also possible to trigger the sound manually using the test button.

Teknisk information:

Power supply	9 V battery (type 1604)
---------------------	-------------------------

Power consumption	6 mA in stand by Max. 200 mA 30 uA after automatic turn off (the switch remains in the ON position)
--------------------------	--

Operating range	9 m
------------------------	-----

Low battery warning	from 8 V
----------------------------	----------

Environmental class II.	General interior (-10 to +40 °C)
--------------------------------	----------------------------------

Complies with	ETSI EN 300 220
----------------------	-----------------

Dimensions	70 x 135 x 29 mm
-------------------	------------------
