

# Glass break simulator

Codice: GBT-212

The GBT-212 is for testing acoustic glass-break detectors. It detects the air pressure changes caused by the flexing or bending of glass and then automatically generates sound imitating the breaking of the glass.

## Descrizione del prodotto:

It is also possible to trigger the sound manually using the test button.

## Informazioni tecniche:

<b>Power supply</b>	9 V battery (type 1604)
---------------------	-------------------------

<b>Power consumption</b>	6 mA in stand by Max. 200 mA 30 uA after automatic turn off (the switch remains in the ON position)
--------------------------	--

<b>Operating range</b>	9 m
------------------------	-----

<b>Low battery warning</b>	from 8 V
----------------------------	----------

<b>Environmental class II.</b>	General interior (-10 to +40 °C)
--------------------------------	----------------------------------

<b>Complies with</b>	ETSI EN 300 220
----------------------	-----------------

<b>Dimensions</b>	70 x 135 x 29 mm
-------------------	------------------
