

Small wall mounting box for PIR detectors

Kod: JA-196PL-S

The bracket has been designed for the installation of a PIR detector of the JA-1x2P series onto a plasterboard or brick wall. Thanks to this way of installation the detector is partly flush-mounted and fits the wall in a very elegant way.

Opis produktu:

The wall bracket is available in two colour versions - white and grey.

Informacje techniczne:

Frame mounting holes

65 x 117 mm
