Label printer

Code: PT-P700-X

Using this printer you can print labels for control segments of access units (keypads) at installation. The printing is possible straight from F-Link software version 1.2.0 or higher from the access module internal settings.

Product description:

The drivers have to be installed for the proper functioning of the printer. The printer can also be used for printing labels using P-Touch Editor Lite software saved inside the printer memory. In this case no drivers are required.
