

Wireless PIR motion detector with basic pet immunity

Code: JA-150P PET

The product is a wireless system device for the JABLOTRON 100+ . It is designed to detect human body motion inside buildings. Compared to standard PIR motion detectors from the JABLOTRON 100+ series, its detection characteristics are modified and have basic immunity to animals.

Product description:

The detector eliminates the movement of small animals along the floor (up to about 25 kg and a max. height of 40 cm at a distance of up to 7 metres from the detector).

The detector has a pulse response and occupies one position in the system.

The JS-7910 lens is only used for the standard immunity level.

The detector comes fitted with a JS-7910 animal lens with a 90°/12 m angle.
