

Stand-alone carbon monoxide detector

Code: EI208W

The product serves for the detection of CO (carbon monoxide) gas and early warning to avoid the harmful effects of this gas on human health.

Product description:

The detector is certificated for use in building interiors, caravans and boats.

The detector indicates excessive carbon monoxide concentration both optically with a LED (EI208DW also shows the concentration data on the display) and acoustically using a built-in siren.

The detector is powered with an integrated lithium battery which supplies the detector for its whole service life.

Technical information:

| | |
|------------------------------------|---|
| Usable life | *10 years (the end of life date is stated on the label) |
| | *8 years with the JA-150G-CO module |
| Power | Integrated non-replaceable lithium battery |
| Typical battery lifetime | for the whole usable life of the detector |
| Operating temperature range | 0 °C to +40 oC |
| Humidity range | 15% to 95% (non-condensing) |
| Dimensions, weight | 120 x 105 x 40 mm, 170 g |
| Conformity | EN 50291-1; EN 50291-2, EN 50270 |
