Jointed bracket for JA-1x1P and JA-1x2P PIR detectors

Code: JA-191PL

The holder has been designed for the installation of a PIR detector of the JA-1x1P and JA-1x2P series onto a plasterboard or brick wall. Thanks to this way of installation the detector in partly flush-mounted and fits the wall in a very elegant way.

Product description:

The wall holder is available in two colour versions - white and grey.
