JABLOTRON

Bus interface for wireless components

Code: JA-110R

The JA-110R two-way radio module is used to connect wireless devices such as detectors, to the security system. For complete coverage of the secure area up to 3 JA-110R modules can be installed.

Product description:

The module communicates with and is ppwered by the bus. The module can be optionally mounted into the control panel. It is addressable, and occupies an alarm system position.

Specifications

Power	12 V bus (9 ... 15 V)
Current consumption in standby (quiescent)	25 mA
Current consumption for choice of cable	25 mA
Radio communication th>	868.1 MHz
Dimensions	150 x 40 x 23 mm
Classification	grade 2 according to EN 50131-1, EN 50131-3, EN 50131-5-3
Environment	EN 50131-1. general indoor
Operating temperature range	-10 to +40 ° C
Complies with	ETSI EN 300220, EN 50130-4, EN 55022, EN 60950-1
Can be operated to	ERC REC 70-03
