Shutter-movement detector

Code: CT-01

The CT-01 is wired detector for detecting the unauthorised movement of external window shutters on houses or buildings. Can be connected with JA-150M or JA-81M

Product description:

In practice the **CT-01 wired outputs** are connected to the **wired input** of a **JA-81M door detector** to connect the CT-01 signals to the **Oasis alarm system**. False alarms caused by the wind moving the shutters are avoided by the door detector **only raising the alarm** when at least **3 pulses are received** from the CT-01 in 5 seconds.

Technical information:

Output contact of detector	100 mA/60 V
Range of movement	5 to 260 cm
Dimensions	94 x 102 x 17 mm
Environment according to EN 50131-1	III. outside protected
Operating temperature range	-25 °C to +50 °C
Maximum wire length to JA-81M door detector	3 m
