

Wireless wall controller for venetian blinds and roller shutters

Code: JB-162JN

Shading control at a single touch, or with a tap on your phone? With the wireless JB-162JN controller you can operate external venetian blinds and roller shutters directly in the JABLOTRON 100+ ecosystem. Bedroom, living room, kitchen – you group everything exactly as you need. Thanks to quick installation, in just a few minutes you create a smart solution that lets you take full advantage of the link with your alarm.

Product description:

KEY BENEFITS

- **Local control:** Backlit buttons; the light activates when you bring your hand close.
- **Extended central control:** Via the Natus keypad and the MyJABLOTRON 2 app.
- **Groups of blinds and roller shutters:** Easy control by room or by compass direction, and so on.
- **Response to the system:** Programming of scenarios and responses to alarm events (setting, dusk, temperature, time, alarm).
- **Automatic safety raise:** In the event of fire, strong wind or another critical event.
- **Simple installation:** Into a standard electrical box, with no additional blind relays.
- **For standard motors:** Works with conventional analogue motors, with no need for further controllers or a smart home system.
- **Design:** A modern finish matched to other JABLOTRON products (white and anthracite black versions).

Technical information:

Communication with the system	Wireless, two-way, synchronous
System compatibility	JA-103K, JA-107K, JA-108K
Power supply	230 V AC, max. 10 A fuse protection
Consumption (rated / peak)	20 mA / 300 mA (230 V)
Outputs	2× switched phase L 230 V / max. 5 A
Supported motors	Conventional (analogue) blind and roller shutter motors
Mounting	Electrical box, 60 mm spacing
Dimensions	82 × 82 × 11 mm
Environment class	Class II – General indoor
Temperature range	–10 to +40 °C
Available versions	JB-162JN (white), JB-162JN-AN (anthracite)
